

Parasol

4 NEW DESIGNER COLORS LAUNCHING IN 2021.

Parasol[™] is designed for Australian conditions and made to stringent quality and manufacturing specifications.

Parasol™ is a commercial grade knitted shadecloth suitable for tension structures and other heavy duty applications. It is manufactured using a combination of high density monofilament and tape which offers a higher degree of protection from UV radiation, known to cause sunburn and skin cancers.

For ease of fabrication and improved performance, Parasol $^{\text{TM}}$ shadecloth has been 'heat set' before rolling, to improve lay flat characteristics and dimensional stability.

UV STABILIZED

HEAT SET

ABRASION RESISTANT

UP TO 95% UVR BLOCK

/ HIGH STRENGTH

10 YEAR WARRANTY

PRODUCT DISCLAIMERS:

The above information represents the results sourced from third party testing authorities, and tolerances may vary by as much as 10%.

The Manufacturer reserves the right to alter or modify product specifications and colors without notice, and assumes no obligation or liability for the suitability and use of its products other than those applications intended by the manufacturer.

Colors shown may not be an exact representation of the actual product.

Outdoor fabrics are subject to harsh conditions and degradation over time is to be expected. Parasol $^{\mathbb{M}}$ is supported with a 10 year limited UV warranty. During this period the fabric will remain serviceable and fit for purpose.

Color fading is normal over time. Colors containing red and yellow pigments have a tendency to fade more than others. This is not a loss of strength caused by UV breakdown and is not covered by the product warranty. For more details refer to the supporting Polyfab product warranty.

Polyfab USA assumes no liability in the event of negligent installation / fabricationor application or choice of cloth.

During installation, Polyfab shadecloth should not be subject to "pre-stressed" loading in excess of 20%.
